Original Green Quality
Suitable for MRI and CT scans -
inclusive of 5 different table options

## Don't just take our word for it...

"What I like most about the Haico tables is the sense of weightlessness. Even with a **700 kg horse** on the table, it is easy to move the horse and table, easy to adjust the panels, and easy to alter the table height" - Dr. Jessica Kidd DVM DipECVS MRCVS

# Haico Basic

Equine surgery table with great quality and budget price!

- Removable middle panels allow the surgeon to get closer to the patient.
- Head support can be moved sideways in three places and leg support can be fitted in eight places.
- Power 110V/230V.
- High quality and neat appearance
- Haico practice
- Low 12 volt voltage. Cable free electric unit. Totally protected structure. CE-certified
- Height can be controlled steplessly. Head support angle can be changed in both directions. Mobility single-handedly even when loaded.
- Narrow middle part prevents back strain. To get closer to the patient, the side-panels can be let down.
- Seamless, pressure-water-washable structure.
- Necessary standard equipment. Extra equipment available.

# Haico Telgte 1

The Haico Telgte I has excellent build quality and features some of the following advantages for ease of use, safety and function:

- Low 12V voltage
- Cable free electric unit
- Protected structure
- Functionality: height and all panel adjustments can be controlled steplessly.
- Mobility single-handedly even when loaded.
- Narrow middle parts to prevent back strain
- Side panels can be let down for more patient accessibility
- Seamless, pressure-water-washable structure.

# Haico Telgte 2

The Haico Telgte II has excellent build quality and features some of the following advantages for ease of use, safety and function:

- Low 12V voltage
- Cable free electric unit
- Protected structure
- Functionality: Longitudinal tilt. Height and all panel adjustments can be controlled steplessly.
- For special surgeries, pelvic angle and head support angle can be changed in both directions.
- Mobility single-handedly even when loaded.
- Narrow middle parts to prevent back strain
- Side panels can be let down for more patient accessibility
- Seamless, pressure-water-washable structure

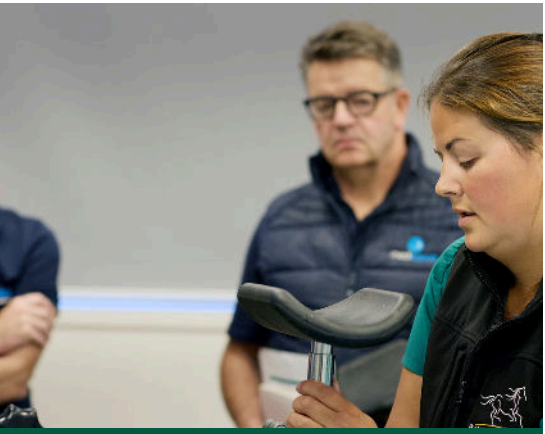
# Haico Telgte Pro 3

The most feature rich veterinary surgical table, encompassing all the features of the Haico range with added benefits including:

- 4-way tilt – new lateral tilt +/- 15% ideal in abdominal surgery for decompressing cecum overload and in lateral recumbency.
- Table top available in two different sizes – Medium and Large
- All side panels are easily removable
- Head support can be moved sideways
- Control buttons located in front for easy access during operation
- Two speeds on lift for unloaded / loaded table
- New special treatment on all metal surfaces
- Special battery
- Minimum height of only 30 cm (1 ft)
- Fully loaded with all accessories available

# What's included:

- Haico Telgte 2 table with special surface coating, close-cellular padding material and a seamless polyurethane surface
- Haico colon tray, aluminium, small
- Complete leg support with a length of 230mm padded support
- Stand for instruments, steel x1
- Anaesthetic hose support, stainless steel x1
- Lockable wheels, approx. 150 mm, stainless steel x4
- Directional lock in one wheel
- Gas hydraulic adjustable sidepanels x4
- Gas hydraulic adjustable head support
- Removable side panels for middle section x2
- Vertical pole, length 1700mm, stainless steel x4
- Horizontal bar, length 1100mm, stainless steel x2
- Horizontal bar, length 2100mm, stainless steel x1
- Stand for infusion bottles, chromium-plated x1
- Binding rope locks, plastic x8
- Self locking hold down clamps, chromium-plated x4
- Velcro binding bands x4
- Cable free electrical unit
- Automatic battery charger 7A wall mounted



The Haico table comes with a broad range of accessories to enable accurate positioning and control for the full range of equine surgical procedures.

Vertical and horizontal bars enable limbs to be supported rigidly or flexibly as required. The modular design means side panels can be added or removed as necessary granting improved access or providing additional support where needed.

Trendelenburg position is easily achieved and adjustments can be made rapidly and smoothly when required.

A range of positions for the head support allows perfect positioning during airway surgeries and head elevation to avoid nasal congestion at other times.

# Five different operating tables available

Complete range of Haico operating tables to suit every budget and requirement. ✓

## Customer Testimonial

"The Haico table is the gold standard in equine operating tables. It provides a flexible yet stable surface and allows for a full range of positions. Whether performing an upper airway surgery in dorsal or lateral recumbency, or minimally invasive surgery of the limbs, the Haico table provides optimal operating conditions on each occasion."
